CAREER OBJECTIVE

Motivated Full-Stack Developer with a Bachelor of Computer Applications (BCA) and hands-on experience in Python, JavaScript, HTML, CSS, SQL, Git, GitHub, AWS, and Docker. Passionate about building responsive web applications and solving real-world problems through technology. Seeking an entry-level software development role where I can apply my technical skills, contribute to organizational success, and continue learning and growing.

INTERNSHIP

Rekonstech, Web Development

06/2024 – 07/2024

- Developed responsive web pages using HTML, CSS, and JavaScript for desktop and mobile devices.
- Implemented DOM manipulation and event handling to enhance user interaction.
- Applied responsive design principles to improve website usability and performance.
- Maintained clean and well-structured HTML, CSS, and JavaScript code for better readability and maintainability.

Rubixe.ai, Language Translator GUI (Python)

05/2024 – 05/2024

- Developed a desktop language translation application using Python and Tkinter.
- Utilized translation libraries to translate user-entered text into multiple languages.
- Implemented input validation, event handling, and a user-friendly graphical interface to improve usability.
- Displayed translated output through the graphical interface to provide a seamless user experience.

EDUCATION

BACHELOR OF COMPUTER APPLICATIONS, Sri Krishna Degree College, Bengaluru

10/2024

CGPA: 7.64 | Grade: A+

COMMERCE(CEBA), Vijaya Composite Pu College, Bengaluru

07/2021

62.00%

CLASS 10, Mahila Mandli Vidya Samsthe, Bengaluru

05/2019

60.00%

SKILLS

1. Programming Languages

Python, JavaScript, HTML, CSS

2. Databases

SQL (MySQL, PL/SQL)

3. Concepts

Object-Oriented Programming (OOP), DevOps, SDLC

4. Cloud & Tools

Cloud Computing, AWS (Linux), Docker, Jenkins

5. Version Control

Git, GitHub

LANGUAGES

- Kannada
- English
- Telugu

CERTIFICATIONS

1. Python Full Stack with DevOps:

QSpiders Software Training Institute, Basavanagudi

2. JavaScript & HTML:

Glovish Technology

PROJECTS

Parkinson's Disease Prediction

05/2024 – 07/2024

Technologies: Python, Pandas, NumPy, Scikit-learn

- Developed a machine learning model to predict Parkinson's disease using clinical datasets.
- Performed data preprocessing, feature engineering, and data normalization to improve model performance.
- Trained and evaluated classification algorithms for Parkinson's disease prediction.
- Optimized the machine learning pipeline to improve prediction accuracy.
- Analyzed model performance using evaluation metrics to assess model reliability.

ATM Management System (Python)

09/2025 – 10/2025

Technologies: Python

- Developed a console-based ATM Management System using Python.
- Implemented secure PIN authentication using the getpass module.
- Added balance inquiry, cash withdrawal, deposit, and PIN change functionalities.
- Applied input validation and updated account balances in real time to ensure secure and accurate transactions.
- Structured the program using Python functions to improve code readability and maintainability.

Caterpillar Growth Game (Python, Turtle Graphics)

07/2025 – 08/2025

Technologies: Python, Turtle Graphics

- Developed an interactive 2D game using Python Turtle Graphics.
- Integrated keyboard controls, collision detection, and game-over functionality.
- Applied event handling to capture keyboard inputs and control game execution.
- Structured the game logic using Python functions for better readability and maintainability.
- Added a scoring system to provide real-time score updates during gameplay.
